Profile

A generalist software engineer who specializes in building web applications. Passionate and aspirational engineering leader with a sound record of solution-based critical thinking and positive results. Adept at using interpersonal abilities to encourage and guide team members to design, develop and implement innovative engineering products.

Employment History

Senior Software Engineer , State Farm

August 2019 — Present

- Modernized state farm's auto insurance application by replacing an older framework (SFX) with a newer framework (1X).
- Collaborated with an agile team of 7, and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first.
- Utilized Spring Boot and Java for building services and business logic.
- Improved test coverage using Junit and utilized GitLab for DevOps.

Software Engineering Mentor (Volunteer) , CareerVillage

November 2022 — Present

- CareerVillage is a community where students can get free personalized career advice from real-life professionals. I am volunteering my time to help students that want to get into the field of software engineering.

Software Engineer , Keep Dallas Beautiful

January 2019 — August 2019

- Keep Dallas Beautiful's mission is to improve the quality of life in Dallas through community-driven projects that create a cleaner, greener city full of vitality. I helped create a prototype web application for the organization that lets users sign up for projects that help keep Dallas clean.
